

INTEGRATED WORKFORCE MANAGEMENT SOLUTIONS

45 years' experience - 1,528 customers

Full Seamless Integration with Zellis

HFX's SaaS Cloud Time & Attendance and Rostering solution is configurable for any company size and any sector.

It is quick and easy for HR teams to create and manage staff schedules and handle holiday, shift and time-off requests too. The unique budgeting & costing module helps managers reorganise their staff planning cost effectively and in real time.

HFX's Time & Attendance can also be used to capture sickness and absence data, track mobile workforces or lone workers, and analyse performance against KPIs.

HFX has over 80 clocking options from biometric readers to mobile devices. Its advanced connectivity also means you can keep existing time recording devices if you wish.

SEAMLESS INTEGRATION & DATA FLOWS

Two-way Integration

HFX's solution suite fully integrates with Zellis's core HR and payroll system, so you have a comprehensive picture of your workforce.

Zellis's two-way integration with HFX's solutions means user accounts are automatically updated or created when employee records are changed or made in Zellis. Absence records are stored in Zellis and brought into HFX for centralised reporting, ensuring all records are correct in real-time.

Market Leaders

HFX has over 45 years' experience in building and delivering Time & Attendance, Rostering and Flexitime systems, and first introduced the concept of flexible working to the UK in the 1970s.

With over 1,500 SMEs and Enterprise customers, the HFX client mix is evenly distributed between private and public sectors, and includes some of the country's largest public-sector organisations.
