HELPING YOU MAKE THE RIGHT CHOICE

With over 50 years' experience in delivering workforce management solutions, HFX is the leading expert and trusted partner in providing a complete solution to the private and public sector.

Our guide to choosing the right method for data collection is based on many years working with companies of all sizes across all industry sectors, many of which have complex data recording requirements due to multiple sites, remote locations or mobile workers. Other key considerations are special environments such as dusty areas, cold rooms, wash down areas, outdoors or even an upmarket city office reception area which may require an attractively designed device. A newer factor has been the covid pandemic which created a sudden requirement for touch-free biometric readers/devices.

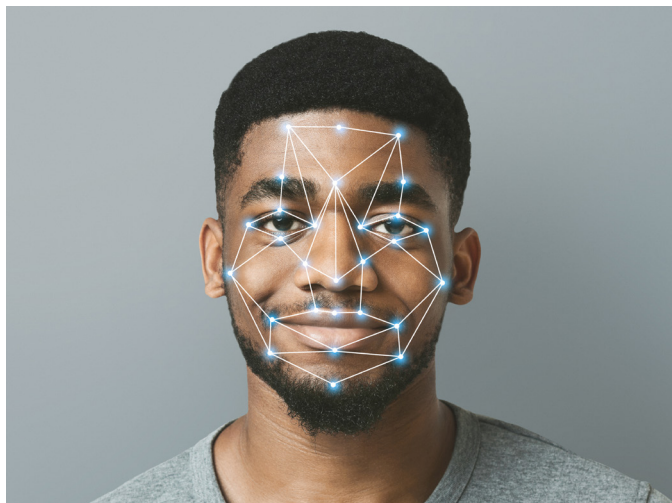

This guide is designed to help you make the right choice.

TOUCH FREE TERMINALS

The Covid pandemic created an urgent need for hygienic touch-free devices to reduce contagion in the workplace. We received a high demand of requests from existing customers and new prospects for secure touch-free devices.

Due to our extensive experience in connecting to any modern device, we were able to instantly test and trial the best face recognition readers on the market, and are delighted to now offer these as part of our extensive range of terminals.

DATA COLLECTION AND ACCESS CONTROL COMBINED

HFX is a unique supplier in the Workforce Management market place in that we offer full cover and devices for Time & Attendance AND Access Control, all connected to the same staff database.

This is also available for Visitors and Contract Workers.
